Software Magazine Ranks TMA Resources as one of the World's Largest Software Companies
Successful Association Management Software (AMS) Personify helps TMA Resources secure a Software 500 spot for eighth consecutive year

[Vienna, VA] October 15, 2009 – TMA Resources, a leading provider of association management software, today announced its inclusion on the *Software Magazine's* Software 500 ranking of the world's largest software and service providers, now in its 27th year.

[TMA Resources](#) was ranked 303 and had a 31.2% growth rate from last year. TMA Resources was also featured in the Top 10 in Companies in the \$30 Million to \$50 Million Revenue category.

“The entire TMA Resources team is incredibly proud of this recognition by Software Magazine,” said Edi Dor, TMA Resources President and CEO, “we are especially excited about the notable rise in our ranking.” Dor continued, “I contribute this success to our great team of employees who work hard to ensure that [Personify](#), the leading Association Management Software (AMS) system from TMA Resources enables the best member service possible for our clients.”

“The 2009 Software 500 results show that revenue growth in the software and services industry was healthy, with total Software 500 revenue of \$491.3 billion worldwide for 2008 representing 8.8% growth from the previous year,” says John P. Desmond, editor of Software Magazine and Softwaremag.com.

“The Software 500 helps CIOs, senior IT managers and IT staff research and create the short list of business partners,” Desmond says. “It is a quick reference of vendor viability. And the online version at www.Softwaremag.com is searchable by category, making it what we call the online catalog to enterprise software.”

The Software 500 is a revenue-based ranking of the world's largest software and services suppliers targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing. Some 44 percent of the 2009 Software 500 companies are privately held.

The ranking is based on total worldwide software and services revenue for 2008. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting. Suppliers are not ranked on their total corporate revenue, since many have other lines of business, such as hardware. The financial information was gathered by a survey prepared by King Content Co. and posted at www.Softwaremag.com, as well as from public documents.

###
